

Luc Succes

Fractional CTO / Technical Co-Founder

luc@lucsucces.com • San Francisco, USA • linkedin.com/in/lucsucces • lucsucces.com • github.com/l2succes

SUMMARY

Technical leader and 3x startup CTO with 12+ years building and scaling engineering teams. Founded multiple venture-backed companies including a YC-backed fintech startup. Experienced in hiring from zero, defining architecture, and establishing engineering culture. Track record of raising \$5.5M+ in venture funding, shipping products to millions of users, and mentoring engineers from junior to senior. Deep expertise across the full stack with a focus on making the right technical bets for early-stage companies.

TECHNICAL SKILLS

Leadership

Technical Hiring, Team Building, Architecture Planning, Vendor Evaluation, Agile/Scrum, Technical Due Diligence

Strategy

Tech Stack Selection, Build vs Buy Decisions, Cloud Cost Optimization, Security & Compliance, CI/CD & DevOps, Technical Roadmapping

Stack

React, Next.js, React Native, TypeScript, Node.js, GraphQL, PostgreSQL, Redis, AWS, Kubernetes, Docker

EXPERIENCE

Blaze

May 2023 - Present

Co-Founder & CTO

Remote

- Defined technical vision and architecture for stablecoin payments platform serving users in 50+ countries
- Selected and implemented tech stack (Next.js, NestJS, Prisma, PostgreSQL, Redis) balancing speed-to-market with scalability
- Designed microservices architecture on AWS EKS (Kubernetes) achieving 99.9% uptime
- Established CI/CD pipelines, code review processes, and engineering best practices from day one
- Raised \$1.2M in funding including Y Combinator (S24 batch), owning technical narrative for investor pitches

Seasons

July 2019 - February 2022

Co-Founder & CTO

New York, NY

- Hired and mentored a team of 7 engineers from scratch, establishing engineering culture, leveling, and career growth frameworks
- Architected full platform from zero: React Native apps, Node.js backend, PostgreSQL database, and AWS infrastructure
- Made key build-vs-buy decisions for inventory management, payments, and logistics integrations
- Led technical due diligence process for \$4.3M raise from top VCs
- Managed vendor relationships and cloud infrastructure budget, keeping burn rate lean while scaling to thousands of active users

Artsy

January 2017 - September 2019

Tech Lead / Senior Software Engineer

New York, NY

- Led cross-functional team of 8 engineers building collector tools serving 2M+ monthly users
- Mentored junior and mid-level engineers through code reviews, architecture discussions, and regular 1:1s
- Drove adoption of shared React component library across 4 product teams, reducing duplicate code by 60%
- Owned technical planning and sprint processes for the collector experience team
- Built auction bidding platform with real-time WebSocket integration processing \$100M+ annually

Often

Co-Founder & CTO

- Sole technical founder: defined architecture, selected tech stack, and built entire product from ground up
- Shipped iOS keyboard app to 500K+ downloads and #1 in App Store for 72 hours
- Designed backend services handling 1M+ daily API requests with real-time content delivery
- Managed outsourced designers and QA contractors while owning all technical decisions

June 2015 - December 2016

New York, NY

Spotify

Software Engineer

- Shipped features across iOS, web, and desktop clients to 100M+ users at scale
- Learned large-scale engineering practices: feature flags, A/B testing, cross-platform architecture
- Contributed to Radio feature improvements increasing listening session length by 15%

June 2013 - June 2015

New York, NY

YieldMo

Founding Engineer

- First engineer hire: architected the entire frontend framework and ad serving platform from scratch
- Grew and mentored frontend team from 1 to 5 engineers, establishing coding standards and hiring bar
- Built high-performance JavaScript SDK handling millions of daily impressions

June 2012 - May 2013

New York, NY

EDUCATION

Y Combinator

S24 Batch

New York University

Bachelor of Science, Computer Science

2024

2012
