

Luc Succes

Senior Full Stack Engineer

luc@lucsucces.com • San Francisco, USA • linkedin.com/in/lucsucces • lucsucces.com • github.com/l2succes

SUMMARY

Full stack engineer with 12+ years building consumer products at scale. Founded multiple venture-backed startups including a YC company. Led engineering teams at Artsy and shipped features to 100M+ users at Spotify. Deep expertise in React, Node.js, GraphQL, and cloud infrastructure. Currently building AI-powered tools and exploring the future of fintech through stablecoins.

TECHNICAL SKILLS

Languages	Frontend	Backend	Cloud & DevOps
TypeScript, JavaScript, Python, Go, Swift, Objective-C	React, Next.js, React Native, Tailwind CSS, HTML/CSS	Node.js, GraphQL, PostgreSQL, Redis, MongoDB, REST APIs	AWS, Docker, Kubernetes, GitHub Actions, Vercel, CI/CD

EXPERIENCE

Blaze

Co-Founder & CTO

May 2023 - Present

Remote

- Architected end-to-end stablecoin payments platform for digital nomads and expats, serving users in 50+ countries
- Built full-stack application with Next.js, NestJS, Prisma, PostgreSQL, and Redis for high-performance caching
- Designed microservices architecture on AWS EKS (Kubernetes) achieving 99.9% uptime
- Implemented CI/CD pipeline with GitHub Actions, reducing deployment time from hours to minutes
- Raised \$1.2M in funding including Y Combinator (S24 batch)

Seasons

Co-Founder & CTO

July 2019 - February 2022

New York, NY

- Architected full platform from scratch: React Native apps, Node.js backend, and PostgreSQL database
- Built fashion rental marketplace from zero to thousands of active users
- Designed inventory management system handling 10,000+ items with real-time availability tracking
- Created recommendation engine using collaborative filtering to increase user engagement by 40%
- Mentored and hired a team of 7 engineers, establishing engineering culture and best practices
- Raised \$4.3M from top VCs to build NYC's premier fashion rental platform

Artsy

Tech Lead / Senior Software Engineer

January 2017 - September 2019

New York, NY

- Led cross-functional team of 8 engineers building collector tools serving 2M+ monthly users
- Mentored junior and mid-level engineers through code reviews, architecture discussions, and 1:1s
- Built BMW Art Guide partnership feature with location-based show recommendations using React Native
- Created shared React component library adopted by 4 product teams, reducing duplicate code by 60%
- Built auction bidding platform with real-time WebSocket integration processing \$100M+ annually
- Implemented server-side rendering for artwork pages, reducing time-to-interactive by 50%

EXPERIENCE (CONTINUED)

Often

June 2015 - December 2016

Co-Founder & CTO

New York, NY

- Architected entire system from ground up: Swift iOS app, Node.js backend, and MongoDB database
- Built iOS keyboard app reaching 500K+ downloads and #1 in App Store for 72 hours
- Designed backend services handling 1M+ daily API requests with real-time content delivery
- Created content management system for curating trending emoji and GIF content

Spotify

June 2013 - June 2015

Software Engineer

New York, NY

- Built features for iOS, web, and desktop clients serving 100M+ users
- Developed Radio feature improvements increasing listening session length by 15%
- Implemented A/B testing framework for new feature rollouts across platforms
- Contributed to cross-platform codebase in Objective-C, JavaScript, and C++

YieldMo

June 2012 - May 2013

Founding Engineer

New York, NY

- First frontend engineer at YieldMo; architected the entire frontend framework from scratch
- Built high-performance ad serving platform with JavaScript SDK handling millions of impressions daily
- Grew and mentored frontend team from 1 to 5 engineers, establishing coding standards and best practices
- Created responsive ad units achieving 95%+ viewability scores

EDUCATION

Y Combinator

2024

S24 Batch

New York University

2012

Bachelor of Science, Computer Science
